Au+Au FXT 3.85 GeV beam energy | 2021 P24iy | centrality-integrated, charge-inclusive

Model-dependent TPC proxy: open markers = reference fits; no TOF / pair-conditioned purity

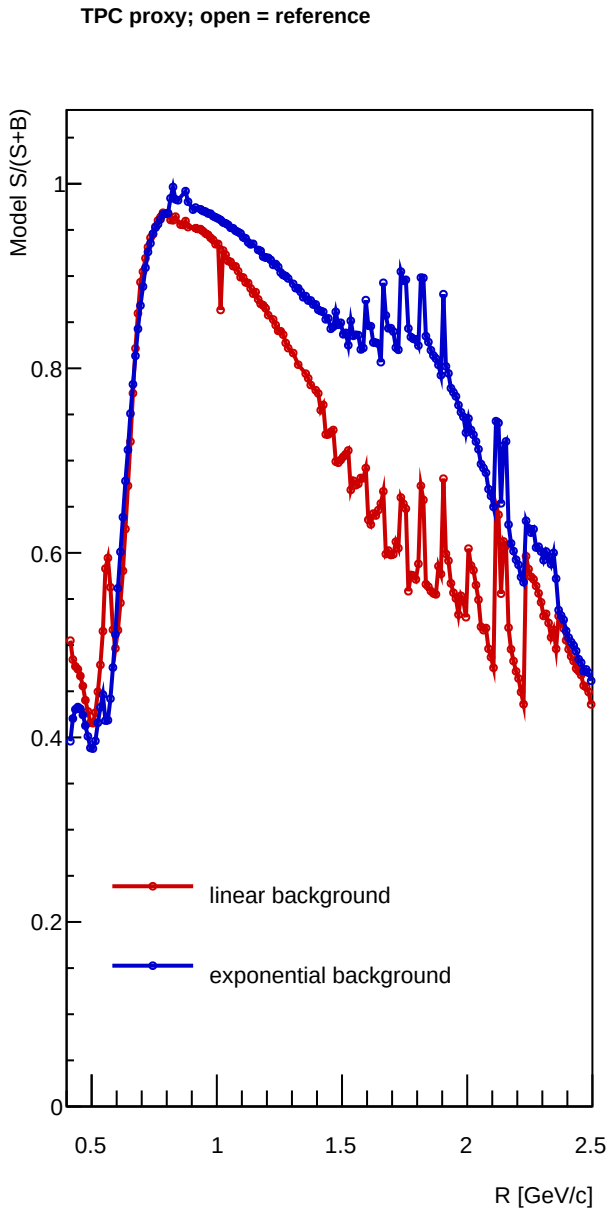

Hatched range = linear/exponential spread at the SAME selection; not a statistical error

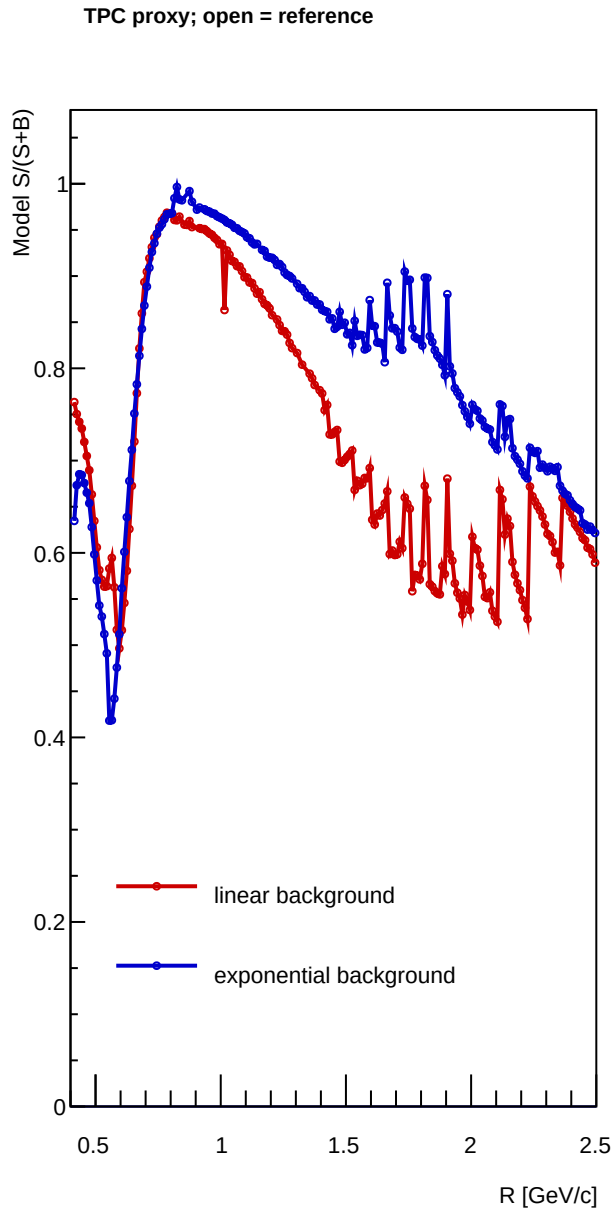

Original calibration $|n\sigma_4|<2$

Applied calibration $|n\sigma_4|<2$

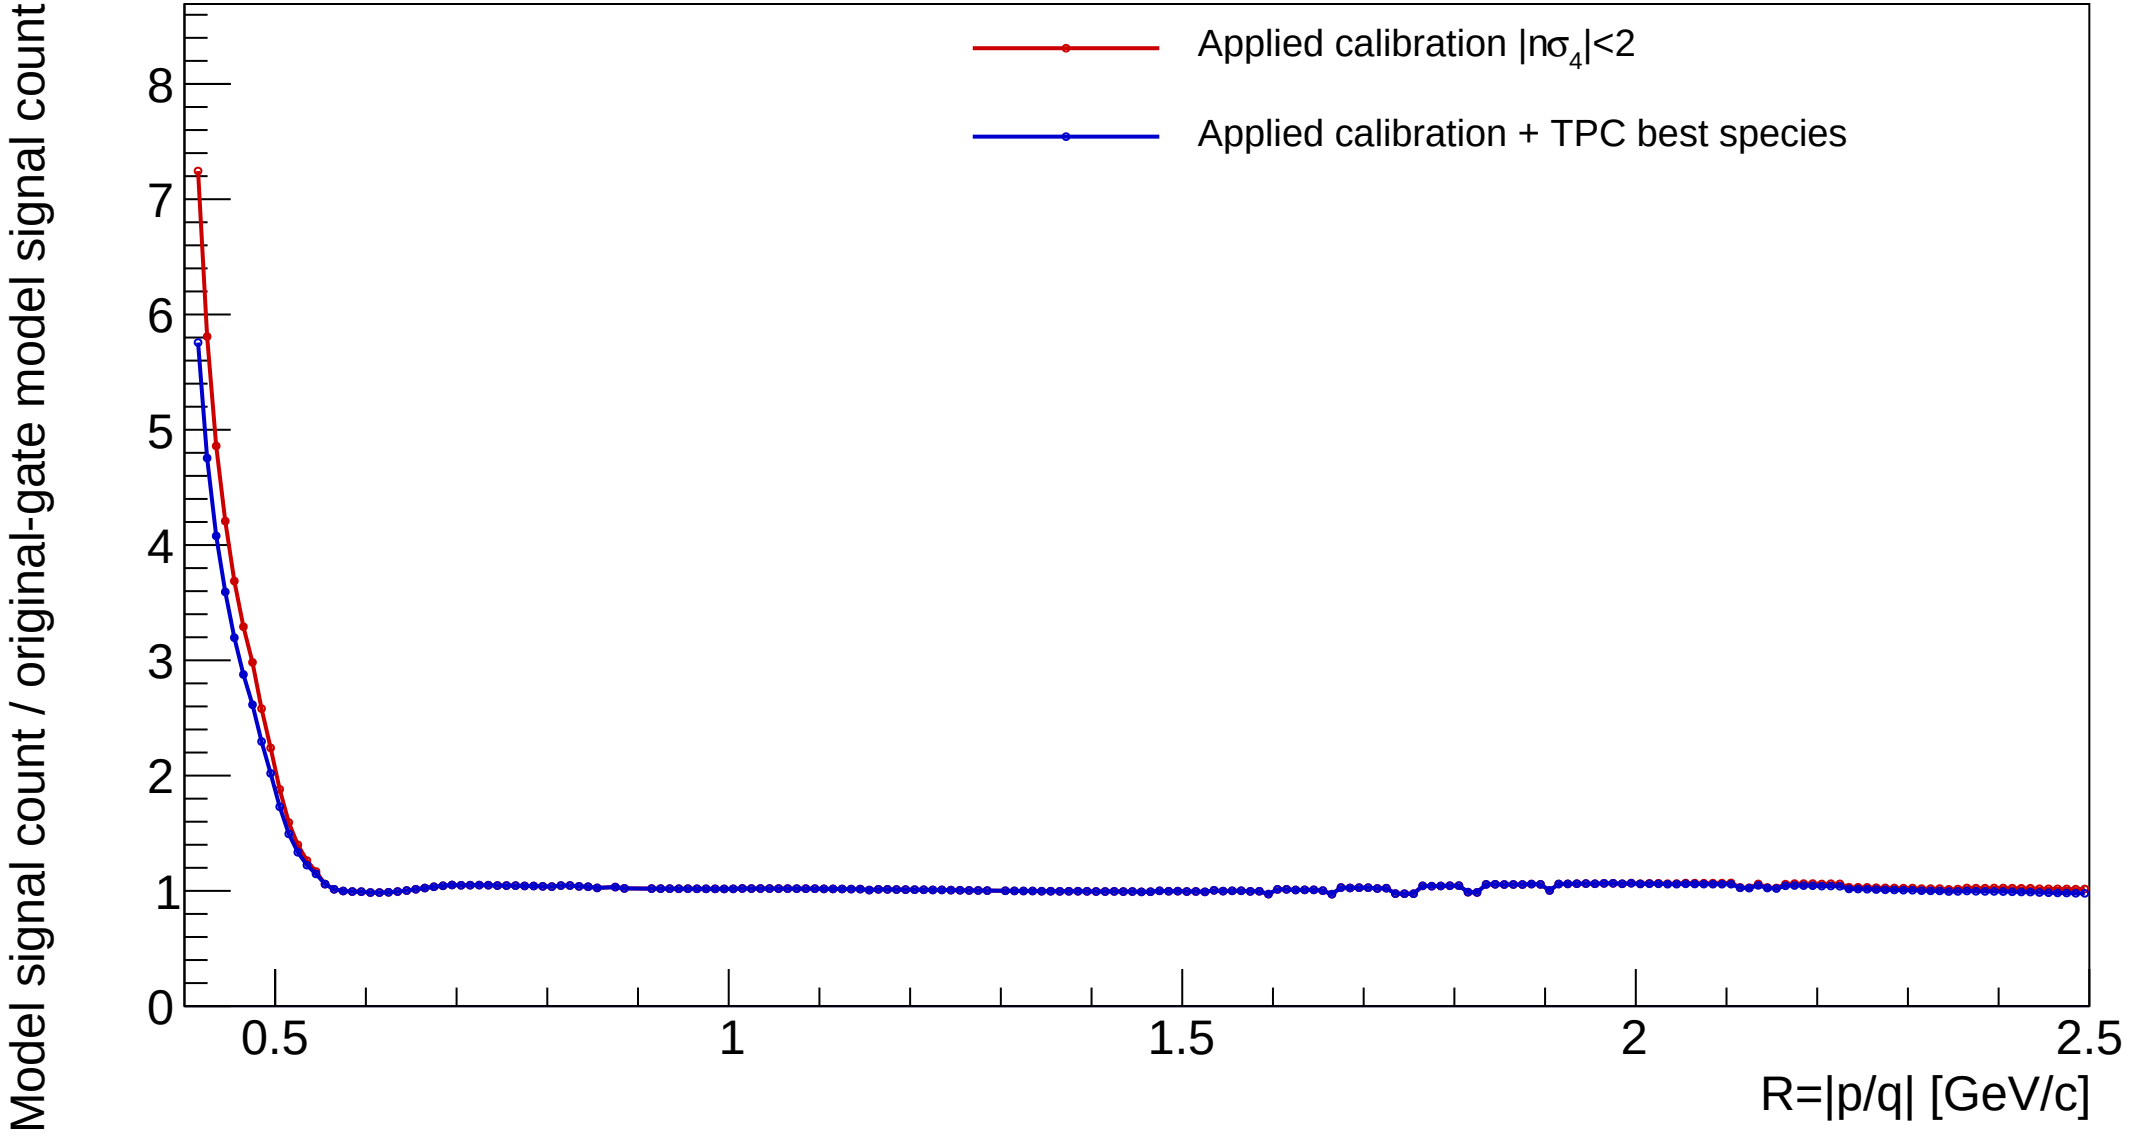

Applied calibration + TPC best species

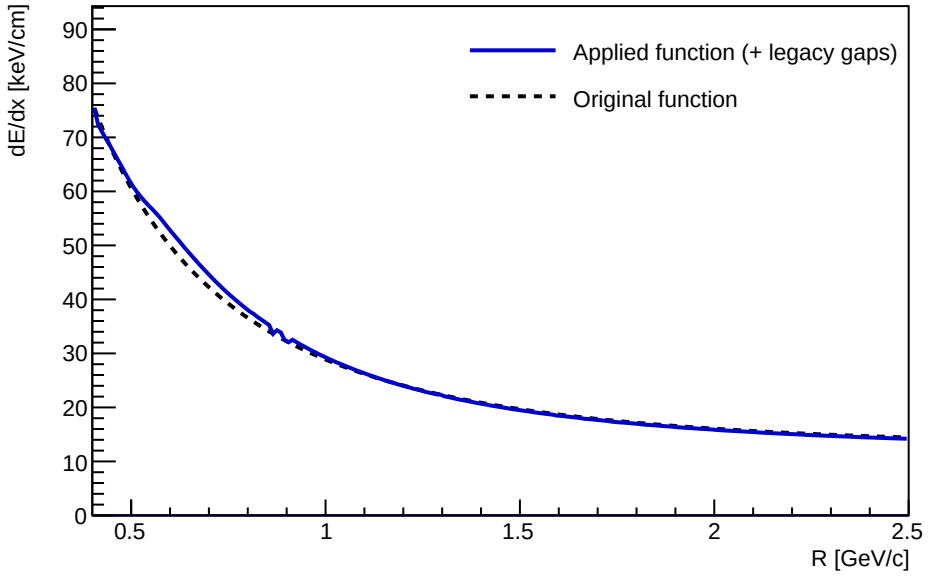

Au+Au FXT 3.85 GeV beam energy | 2021 P24iy | centrality-integrated, charge-inclusive

Model-dependent TPC proxy: open markers = reference fits; no TOF / pair-conditioned purity

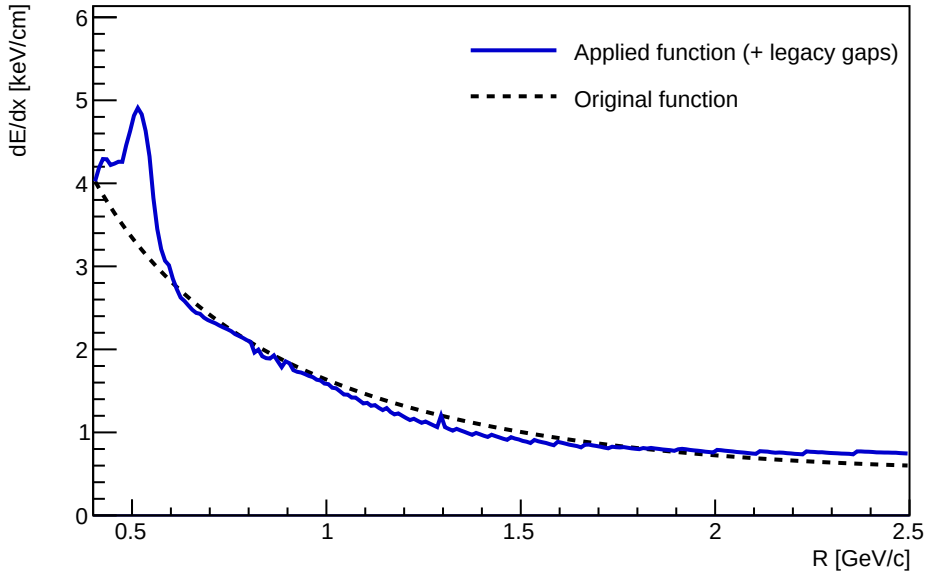

Model window acceptance only: this ratio is NOT an independently measured reconstruction efficiency
