Latest saved low-domain functions on raw COLZ: full recorded dE/dx

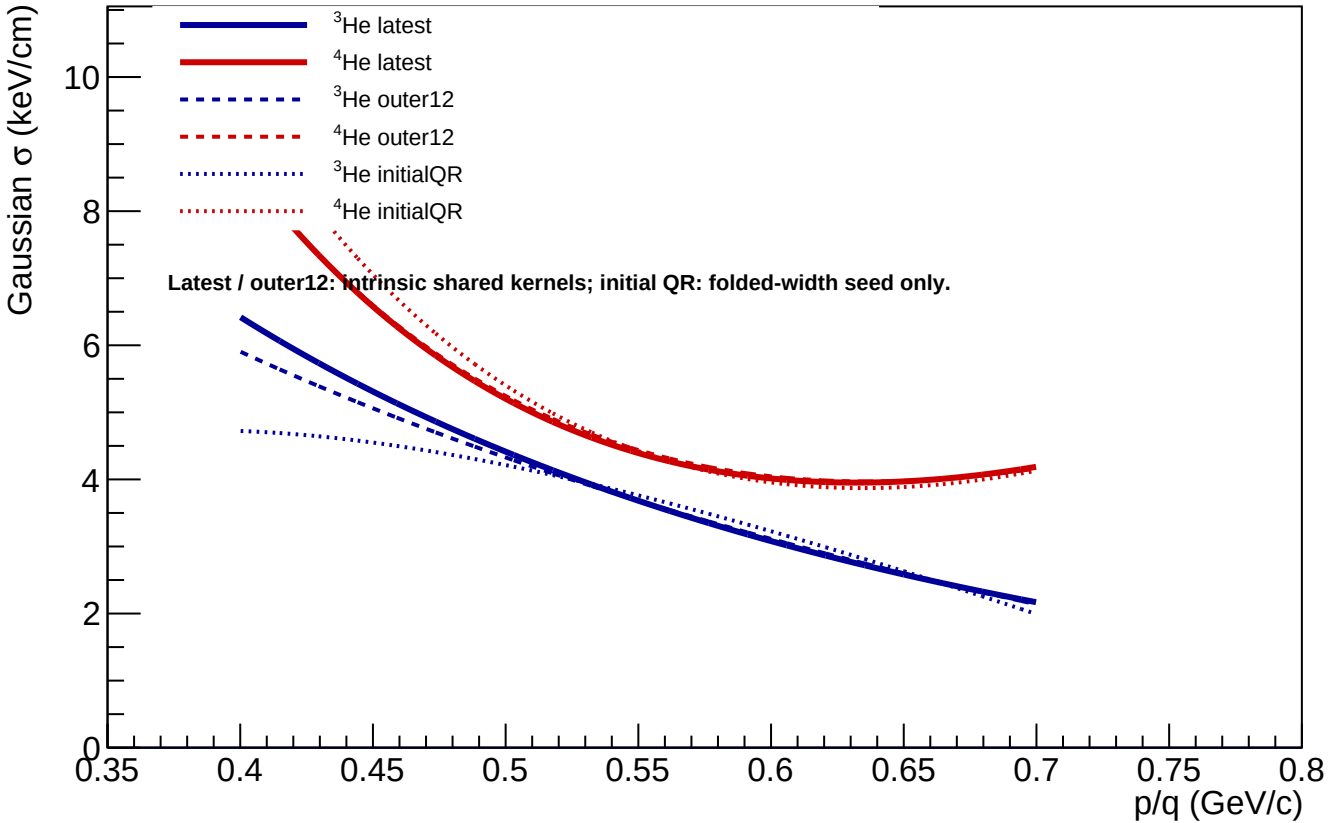

DISPLAY ONLY: pre-PID charge-inclusive raw tracks; model-dependent components; PID NOT adopted.
Latest numerical convergence=NO; shared Minuit status=0; curves only for $0.40 \le p/q \le 0.70$ GeV/c.

Latest saved low-domain functions on raw COLZ: nuclear region

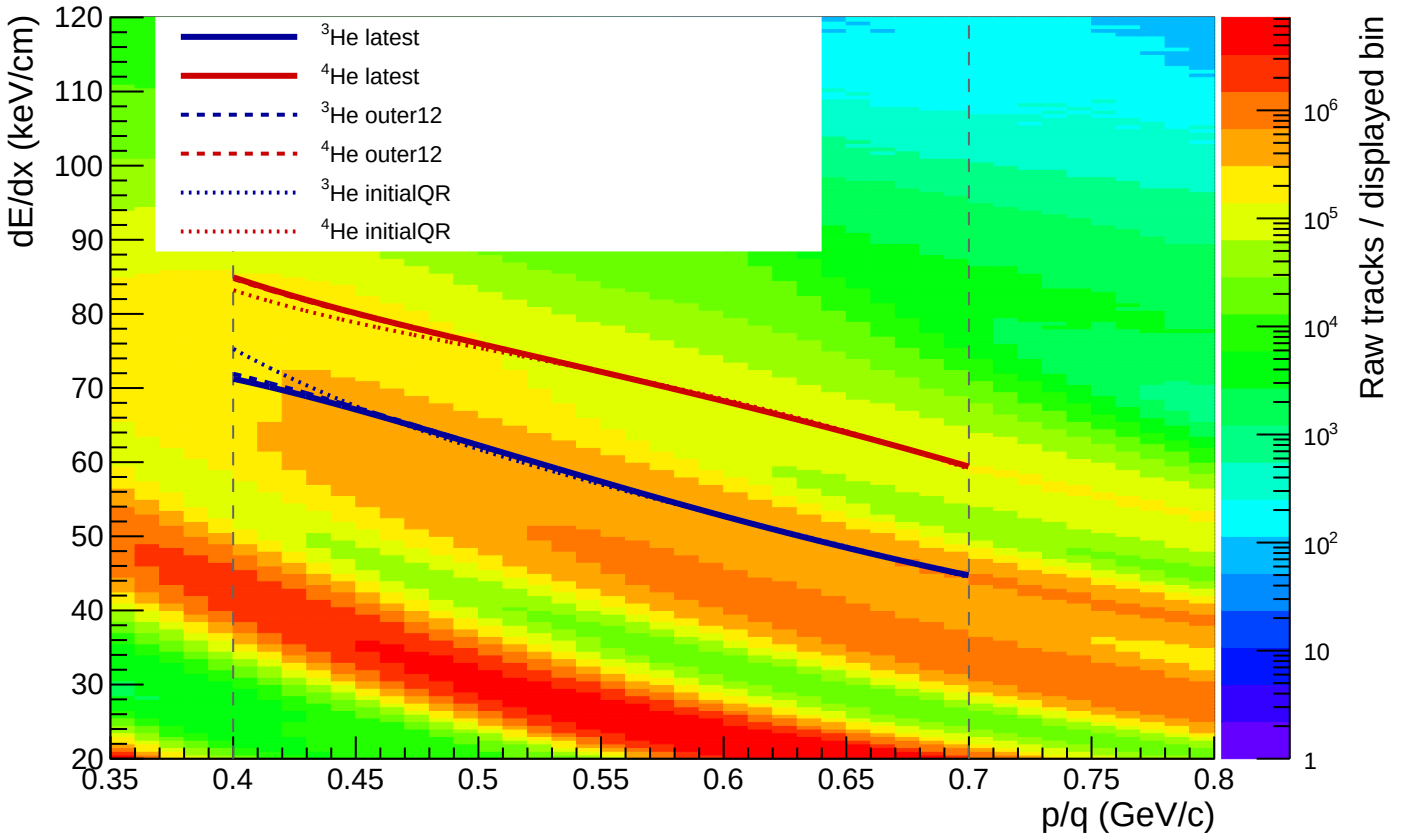

DISPLAY ONLY: pre-PID charge-inclusive raw tracks; model-dependent components; PID NOT adopted.
Latest numerical convergence=NO; shared Minuit status=0; curves only for $0.40 \le p/q \le 0.70$ GeV/c.

Width comparison: latest vs outer12 vs initial FREE-derived QR

DISPLAY ONLY: pre-PID charge-inclusive raw tracks; model-dependent components; PID NOT adopted.
Latest numerical convergence=NO; shared Minuit status=0; curves only for 0.40 ≤ p/q ≤ 0.70 GeV/c.

Center comparison on the identical raw COLZ: study references only

DISPLAY ONLY: pre-PID charge-inclusive raw tracks; model-dependent components; PID NOT adopted.
Latest numerical convergence=NO; shared Minuit status=0; curves only for $0.40 \le p/q \le 0.70$ GeV/c.
